Transfer/Readmit Major Admission Guide Summer-Fall 2015 and Spring 2016

Using this guide

Please note: this guide is for informational and planning purposes only. It may not be possible to offer admission to all qualified applicants because of a competitive applicant pool and space limitations.

The “average admitted profile” column indicates the typical range of students who were admitted to the major, sequence, or program during the last application cycle. The range is intended to give applicants a better indication of the quality of students recently admitted.

Admission decisions

Highest admission priority will be given to transfer students with the strongest academic records. The average grade point average for transfer students admitted for the Fall of 2014 was 3.1 on 4.0 scale.

Transfer students may be admitted to the University with an undeclared major if the program prerequisites are not met or if the preferred major has filled to capacity. Students with 75 or more earned credit hours cannot be admitted to the University as undeclared students.

Planning your coursework

All transfer students are encouraged to complete the course equivalencies of ENG 101, ENG145, COM110, and an IAI-approved Math course prior to enrolling at Illinois State.

The prerequisite and recommended coursework equivalents can be found online at IllinoisState.edu/TransferProgramRequirements.
